Welcome to DialogLink - Version 5

Revolutionize the Way You Work!

New on Dialog

Order Patent and Trademark File Histories Through Dialog

Thomson File Histories are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

Thomson File Histories are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)
- Derwent World Patents Index (File 351)
- Derwent World Patents Index (File 350)
- Ei EnCompassPat (File 353)
- European Patents Fulltext (File 348)
- French Patents (File 371)
- German Patents Fulltext (File 324)
- IMS Patent Focus (File 447, 947)
- INPADOC/Family and Legal Status (File 345)
- JAPIO - Patent Abstracts of Japan (File 347)
- LitAlert (File 670)
- U.S. Patents Fulltext (1971-1975) (File 652)

- U.S. Patents Fulltext (1976-present) (File 654)
- WIPO/PCT Patents Fulltext (File 349)
- TRADEMARKSCAN - U.S. Federal (File 226)

DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)
- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

*** ANNOUNCEMENTS ***

"Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

The 2008 EMTREE Thesaurus has been added to EMBASE (Files 72, 73, 772, and 972)

RESUMED UPDATING

IBM: New IBM e-commerce software will lead companies into the next generation of e-business

M2 PRESSWIRE

January 25, 2000

JAN 25, 2000, M2 Communications - San Diego -- IBM today announced e-commerce software that helps e-businesses build customer loyalty and site activity to increase revenues.

The software suite includes WebSphere Commerce Suite* version 4.1 (formerly Net.Commerce) and WebSphere Commerce Studio*.

WebSphere Commerce Suite 4.1 offers new, advanced functionality needed by the next generation of e-commerce businesses. It has features that allow companies to increase revenue through targeted customer loyalty and relationship marketing programs, including: Personalization; merchandising; business analysis and reporting; order management; auctions; and integration with existing systems and processes.

As a result, the software provides the full range of features and functionality necessary to meet the needs of the three major markets for e-commerce: Business-to-business, business-to-consumer and e-marketplaces. In addition, the new version is integrated with the Web development and design tools from IBM's WebSphere Web application server software as well as WebSphere's core technology. As a result, companies can build e-business applications quickly by integrating their e-commerce sites with these core

technologies, which provide collaboration and high-volume transactions functionality.

WebSphere Commerce Studio tools are easier to use, reducing development time and costs. The tools provide a flexible and powerful web application development and management workbench for advanced, rapid and easy web application development, integration, deployment, usage and management.

"Today we see many companies in varying stages of e-commerce site development," said Ed Kilroy, general manager, electronic commerce solutions, IBM. "Whether a company is just beginning to build an e-commerce site or exploring and implementing more complex functionality such as integrating their supply chain with partners and leveraging customer information, WebSphere Commerce Suite is the only product in the marketplace today that offers an end-to-end solution for all stages of e-commerce development, deployment, and management." IDC estimates e-commerce will grow from the \$111 billion reported in 1999 to \$1.3 trillion in the year 2003; 86 percent of this projected total will come from the rapidly emerging business-to-business segment.

"By combining unmatched breadth of functionality with deep deployment capabilities, WebSphere Commerce Suite takes Internet commerce management to the next level," said Paul Scarpa, senior analyst, The Yankee Group. "IBM's e-commerce solutions have always been designed with the Internet developer and systems administrator in mind. The personalization, rules management, and analysis tools available in their latest release ensure that the needs of the e-marketers are comparably well served."

Advancing Sites to the Next Level
Personalization

WebSphere Commerce Suite enables businesses to build customer loyalty

with functions such as personalization. The personalization function utilizes individual customer profiles to analyze customer needs and respond with compelling, customized offers. New catalog enhancements help drive sales through capabilities like up-selling and cross-selling.

IBM Web Sphere Commerce Suite utilizes Blaze Advisor technology, which provides a rules-based personalization framework to create a electronic catalog for businesses based on specific customer demographics. With this technology, businesses can service their customer needs while implementing marketing and selling programs to provide a more interactive experience for the customer.

Registration, Auctions, Order and Inventory Management

A new dynamic e-marketplace can be created for the rapidly growing number of business-to-business focused companies. Through features such as batch user registration, auction code, and real-time order status and inventory updates, improved operational efficiencies through automated business processes with partners and customers and reduced selling costs are realized. Integration with back-end business-critical systems, enhance order processing by facilitating the exchange of data using emerging industry standards such as the XML protocol.

"Combining the strengths of IBM's WebSphere Commerce Suite with J.D. Edwards' OneWorld will enable our customers to create dynamic e-storefronts that integrate seamlessly with enterprise systems," said Mark Peterson,

vice president, Strategic Solutions, J.D. Edwards. "By integrating these two industry-leading technologies, we can work together to help our customers dramatically transform the way they do business on the Web from improving and reducing the cost of customer service to reaching new markets."

"Whirlpool Corporation initially turned to IBM's commerce products for their ability to integrate and leverage a sizable investment in ERP technology. With WebSphere Commerce Suite v4.1, the company anticipates further benefits including unmatched scalability making WCS the ideal tool platform for all future web development," said Jim Haney, vice president, Architecture and Planning, Whirlpool.

Expanding Relationships and Programs

IBM also announced relationships with several business partners that are providing additional functionality to enhance the relationship marketing and content management capabilities of the offerings. Brightinfo.com, CommercialWare, CyberSource, GTEi, Interwoven, J.D. Edwards, NetPerceptions, net.Genesis, Siebel, Synquest, Versifi, and Vignette are a few of these companies. Additionally, customers such as LLBean, Macy's, Sciquest and Staples are among some of the companies implementing the software to increase their customer loyalty and revenues.

To help partners take advantage of the growing transformation and integration technology market, IBM is continuing its support of the successful Start Now e-commerce program with the release of version 4.1. For small and medium sized businesses that want to quickly establish a secure, robust, commerce-enabled Web site, the industry standards-based Start Now e-commerce solution offers software, hardware, financing and partner services.

Product Availability/Pricing

WebSphere Commerce Suite Pro Edition (formerly Net.Commerce Pro) will be available on February 28, 2000 on NT, AIX, and Solaris. It has a list price of \$38,000. It will be available for the AS/400 and S/390 platforms later in the year.

The Start Edition (formerly Net.Commerce Start) will be available on February 1, 2000 on NT. It has a list price of \$9,500.

WebSphere Commerce Suite will be shipped with DB2 Universal Database Net.Data 6.1, Text Extender 6.1, WebSphere Application Server Advanced Edition 3.0, WebSphere Studio 3.02, HTTP Server 1.3.6, LDAP 3.1, and WebSphere Payment Manager 2.1.

IBM WebSphere Commerce Suite and WebSphere

WebSphere Commerce Suite version 4.1 and WebSphere Commerce Studio software combined with WebSphere Application Server, Advanced Edition provide a core set of technologies upon which future applications services will be built. By leveraging these technologies in the WebSphere family, customers will be able to use a single Web application server technology foundation for a wide range of e-business applications. It allows companies to build essential e-business applications fast, leveraging additional key IBM application services in collaboration and transactions, in addition to a wide-range of partner applications as needed.

IBM's WebSphere Commerce Suite, the first integrated e-commerce solution, provides a wide range of easy-to-use features and functions for content management, relationship marketing, order management, and payment

management for all types of Internet businesses, including business-to-business, business-to-consumer, and e-marketplaces Sites built with WebSphere Commerce Suite can easily integrate with both internal and external systems and grow with the changing needs of an e-business. IBM WebSphere Commerce Suite customers benefit from the functionality of the WebSphere family, which integrates Web commerce, Web application server, Web application development tools, transaction processing and distributed component software from IBM.

Additional information regarding WebSphere Commerce Suite V4.1 is available at <http://www.ibm.com/software/websphere/commerce>.

IBM Corporation

IBM is the world's largest information technology company, with 80 years of leadership in helping businesses innovate. IBM Software offers the widest range of applications, middleware and operating systems for all types of computing platforms, allowing customers to take full advantage of the new era of e-business. The fastest way to get more information about IBM software is through the IBM Software home page at <http://www.software.ibm.com>.

Amazon Countersues IBM As Patent Infringement Case Heats Up; Amazon accuses IBM of using its intellectual property in its Websphere middleware, and of acting like a fly-by-night patent troll.(International Business Machines Corp.)

InformationWeek , NA

Dec 14 , 2006

Text:

Amazon.com apparently believes the best defense is a good offense. In response to a patent infringement lawsuit filed by IBM, the online retailer on Thursday launched several counter-claims against the computer maker--charging that IBM has stolen Amazon intellectual property.

"It is actually IBM that is using Amazon.com's technology without permission, not vice versa," Amazon alleges in court documents.

IBM sued Amazon in October in the U.S. District Court for eastern Texas. IBM claims Amazon's online customer recommendation system, as well as several other features on its popular Web site, violate IBM patents governing a broad swath of e-commerce techniques.

Amazon claims it is actually the innovator. "IBM more recently has sought to follow the lead of Amazon.com and other innovative Web companies by expanding its offerings into Internet technologies. In doing so, IBM has relied on Amazon.com's innovations without regard for Amazon.com's patent rights," Amazon claims in the court filing.

Among other things, Amazon claims IBM's WebSphere and other middleware products infringe on intellectual property rights granted to the company by patents that govern "a system and method for refining search queries" and a "method and apparatus for structuring the querying and interpretation of semistructured information."

Amazon also claims that IBM customers that use Websphere are violating its patent rights. WebSphere is used by thousands of businesses in the U.S and throughout the world and accounts for a significant portion of IBM's revenues.

Amazon.com also accuses IBM, the world's second largest technology company, of acting like a fly-by-night patent troll for buying up patents, and calls the vendor a technological dinosaur that "has never been seriously recognized for providing the nimble, fast paced developments and services needed to offer innovative e-commerce."

Amazon is asking the court for unspecified damages and an order that would prohibit IBM from continuing the alleged infringement of its patents.

New IBM E-Commerce Software Will Lead Companies Into the Next Generation of E-Business.

Business Wire , p 1423

Jan 24 , 2000

Text:

High-Tech Editors

SAN DIEGO--(BUSINESS WIRE)--Jan. 24, 2000 (IBM PARTNER WORLD)

WebSphere Commerce Suite Offers First Integrated Solution For
Personalized Relationship Marketing,

Order Management, Auctions, and Business-to-Business Commerce

IBM today announced e-commerce software that helps e-businesses build customer loyalty and site activity to increase revenues.

The software suite includes WebSphere Commerce Suite(a) version 4.1 (formerly Net.Commerce) and WebSphere Commerce Studio(a).

WebSphere Commerce Suite 4.1 offers new, advanced functionality needed by the next generation of e-commerce businesses. It has features that allow companies to increase revenue through targeted customer loyalty and relationship marketing programs, including: Personalization; merchandising; business analysis and reporting; order management; auctions; and integration with existing systems and processes.

As a result, the software provides the full range of features and functionality necessary to meet the needs of the three major markets for e-commerce: Business-to-business, business-to-consumer and e-marketplaces.

In addition, the new version is integrated with the Web development and design tools from IBM's WebSphere Web application server software as well as WebSphere's core technology. As a result, companies can build e-business applications quickly by integrating their e-commerce sites with these core technologies, which provide collaboration and high-volume transactions functionality.

WebSphere Commerce Studio tools are easier to use, reducing development time and costs. The tools provide a flexible and powerful web application development and management workbench for advanced, rapid and easy web application development, integration, deployment, usage and management.

"Today we see many companies in varying stages of e-commerce site development," said Ed Kilroy, general manager, electronic commerce solutions, IBM. "Whether a company is just beginning to build an e-commerce site or exploring and implementing more complex functionality such as integrating their supply chain with partners and leveraging customer information, WebSphere Commerce Suite is the only product in the marketplace today that offers an end-to-end solution for all stages of e-commerce development, deployment, and management."

IDC estimates e-commerce will grow from the \$111 billion reported in 1999 to \$1.3 trillion in the year 2003; 86 percent of this projected total will come from the rapidly emerging business-to-business segment.

"By combining unmatched breadth of functionality with deep deployment capabilities, WebSphere Commerce Suite takes Internet commerce management to the next level," said Paul Scarpa, senior analyst, The Yankee Group. "IBM's e-commerce solutions have always been designed with the Internet developer and systems administrator in mind. The personalization, rules management, and analysis tools available in their latest release ensure that the needs of the e-marketers are comparably well served."

Advancing Sites to the Next Level
Personalization

WebSphere Commerce Suite enables businesses to build customer loyalty with functions such as personalization. The personalization function

utilizes individual customer profiles to analyze customer needs and respond with compelling, customized offers. New catalog enhancements help drive sales through capabilities like up-selling and cross-selling.

IBM WebSphere Commerce Suite utilizes Blaze Advisor technology, which provides a rules-based personalization framework to create a electronic catalog for businesses based on specific customer demographics. With this technology, businesses can service their customer needs while implementing marketing and selling programs to provide a more interactive experience for the customer.

Registration, Auctions, Order and Inventory Management A new dynamic e-marketplace can be created for the rapidly growing number of business-to-business focused companies. Through features such as batch user registration, auction code, and real-time order status and inventory updates, improved operational efficiencies through automated business processes with partners and customers and reduced selling costs are realized. Integration with back-end business-critical systems, enhance order processing by facilitating the exchange of data using emerging industry standards such as the XML protocol.

“Combining the strengths of IBM’s WebSphere Commerce Suite with J.D. Edwards’ OneWorld will enable our customers to create dynamic e-storefronts that integrate seamlessly with enterprise systems,” said Mark Peterson, vice president, Strategic Solutions, J.D. Edwards. “By integrating these two industry-leading technologies, we can work together to help our customers dramatically transform the way they do business on the Web from improving and reducing the cost of customer service to reaching new markets.”

“Whirlpool Corporation initially turned to IBM’s commerce products for their ability to integrate and leverage a sizable investment in SAP technology. With WebSphere Commerce Suite v4.1, the company anticipates further benefits including unmatched scalability making WCS the ideal tool platform for all future web development,” said Jim Haney, vice president, Architecture and Planning, Whirlpool.

Expanding Relationships and Programs

IBM also announced relationships with several business partners that are providing additional functionality to enhance the relationship marketing and content management capabilities of the offerings. Brightinfo.com, CommercialWare, CyberSource, GTEi, Interwoven, J.D. Edwards, NetPerceptions, net.Genesis, Siebel, Synquest, Versifi, and Vignette are a few of these companies. Additionally, customers such as LLBean, Macy’s, Sciquest and Staples are among some of the companies implementing the software to increase their customer loyalty and revenues.

To help partners take advantage of the growing transformation and integration technology market, IBM is continuing its support of the successful E-commerce Start Now Program with the release of version 4.1. For small and medium sized businesses that want to quickly establish a secure, robust, commerce-enabled Web site, the industry standards-based Start Now e-commerce solution offers software, hardware, and partner services.

Product Availability/Pricing

WebSphere Commerce Suite Pro Edition (formerly Net.Commerce Pro) will be available on February 28, 2000 on NT, AIX, and Solaris. It has a list

price of \$38,000. It will be available for the AS/400 and S/390 platforms later in the year. The Start Edition (formerly Net.Commerce Start) will be available on February 1, 2000 on NT. It has a list price of \$9,000. WebSphere Commerce Suite will be shipped with DB2 Universal Database, Net. Data 6.1, Text Extender 6.1, WebSphere Application Server Advanced Edition 3.0, WebSphere Studio 3.02, HTTP Server 1.3.6, LDAP 3.1, and WebSphere Payment Manager 2.1.

IBM WebSphere Commerce Suite and WebSphere

WebSphere Commerce Suite version 4.1 and WebSphere Commerce Studio software combined with WebSphere Application Server, Advanced Edition provide a core set of technologies upon which future applications services will be built. By leveraging these technologies in the WebSphere family, customers will be able to use a single Web application server technology foundation for a wide range of e-business applications. It allows companies to build essential e-business applications fast, leveraging additional key IBM application services in collaboration and transactions, in addition to a wide-range of partner applications as needed.

IBM's WebSphere Commerce Suite, the first integrated e-commerce solution, provides a wide range of easy-to-use features and functions for content management, relationship marketing, order management, and payment management for all types of Internet businesses, including business-to-business, business-to-consumer, and e-marketplaces. Sites built with WebSphere Commerce Suite can easily integrate with both internal and external systems and grow with the changing needs of an e-business. IBM WebSphere Commerce Suite customers benefit from the functionality of the WebSphere family, which integrates Web commerce, Web application server, Web application development tools, transaction processing and distributed component software from IBM.

Additional information regarding WebSphere Commerce Suite V4.1 is available at <http://www.ibm.com/software/websphere/commerce>.

IBM Corporation

IBM is the world's largest information technology company, with 80 years of leadership in helping businesses innovate. IBM Software offers the widest range of applications, middleware and operating systems for all types of computing platforms, allowing customers to take full advantage of the new era of e-business. The fastest way to get more information about IBM software is through the IBM Software home page at <http://www.software.ibm.com>
